

## Faculty Review of Open eTextbooks

The <u>California Open Educational Resources Council</u> has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (<u>www.cool4ed.org</u>). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextboks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Does the textbook present its subject matter in a culturally sensitive manner? (e.g. Is the textbook free of offensive and insensitive examples? Does it include examples that are inclusive of a variety of races, ethnicities, and backgrounds?)	x			

Total Points: 17 out of 30

Please provide comments on any aspect of the subject matter of this textbook:

- The subject matter presented in this collection of topics is a good match to the course content described for CHEM 160S.
- A text bank is available.

Instructional Design (35 possible points)	N/A (0 pts)	Very Weak (1pt)	Limited (2 pts)	Adequate (3pts)	Strong (4 pts)	Superior (5 pts)
Does the textbook present its subject materials at appropriate reading levels for undergrad use?					х	
Does the textbook reflect a consideration of different learning styles? (e.g. visual, textual?)			х			
Does the textbook present explicit learning outcomes aligned with the course and curriculum?		х				
Is a coherent organization of the textbook evident to the reader/student?		х				
Does the textbook reflect best practices in the instruction of the designated course?				х		
Does the textbook contain sufficient effective ancillary materials? (e.g. test banks, individual and/or group activities or exercises, pedagogical apparatus, etc.)		x				
Is the textbook searchable?				Х		

Total Points: 15 out of 35

Please provide comments on any aspect of the instructional design of this textbook:

• This is a collection of searchable topics listed in alphabetical order. The reader needs to spend time going up and down the list of topics. Each topic leads to a sub-menu. Some of the sub-menus are cross-referenced. There is no table of content, therefore, finding a particular topic takes a lot of time.

Editorial Aspects (25 possible points)	N/A	Very Weak	Limited	Adequate	Strong	Superior

features? (e.g. a table of contents, glossary, citations and			Х			
further references)						
How effective are multimedia elements of the textbook?			х			
(e.g. graphics, animations, audio)			~			

Please provide comments on any editorial aspect of this textbook.

Total Points: 10 out of 25

• Due to the lack of organization and the variety of sources, the multimedia elements and editorial features are either inconsistent or non-existing. The subject matter content is appropriate but the navigation through it is challenging.

Usability (25 possible points)	N/A (0 pts)	Very Weak (1pt)	Limited (2 pts)	Adequate (3pts)	Strong (4 pts)	Superior (5 pts)
Is the textbook compatible with standard and commonly available hardware/software in college/university campus student computer labs?					х	
Is the textbook accessible in a variety of different electronic formats? (e.gtxt, .pdf, .epub, etc.)				х		
Can the textbook be printed easily?				Х		

Does the user interface implicitly inform the reader how to interact with and navigate the textbook?	х			
How easily can the textbook be annotated by students and instructors?			x	

Total Points: 13 out of 25

Please provide comments on any aspect of access concerning this textbook.

- There are updated links.
- Different sections can be saved as pdf files that can be printed to annotate.

## **Overall Comments**

If you were to recommend this textbook to colleagues, what merits of the textbook would you highlight?

• This collection of topics include all required content for CHEM 160S in adequate depth for undergraduate students majoring in science degrees.

What areas of this textbook require improvement in order for it to be used in your courses?

- These collection of topics need to be organized in a sequential order and presented to students in a consistent format.
- Ancillary materials need to be developed.
- Links need to be updated.
- Graphics and animations need to be updated.
